É fácil bordar!

Aprenda a fazer o ponto cruz passo a passo

Material

Use a **linha mouliné**. Ela vem com 6 fios enrolados. Corte de 30 a 40cm e separe os fios pelas pontas. Escolha **agulhas pequenas e sem pontas**. As de números 22 e 24 são as mais indicadas. Separe duas **tesouras**: uma pequena com ponta fina para cortar a linha e outra grande e afiada para cortar o tecido.

O **bastidor** é um aro de plástico ou madeira que serve para esticar o tecido.

Os **tecidos** mais usados são a étamine e o cânhamo.

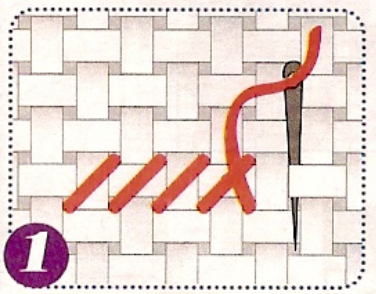
No lugar

Para saber se o motivo vai caber no tecido, divida o número de pontos do gráfico pelo número de pontos que cabem em 1cm de tecido (use uma régua para medir). Exemplo: um gráfico com 40 x 20 pontos, se for bordado em étamine (4 quadrados por centímetro) vai ter 10cm (40 ÷ 4=10) por 5cm (20 ÷ 4= 5).

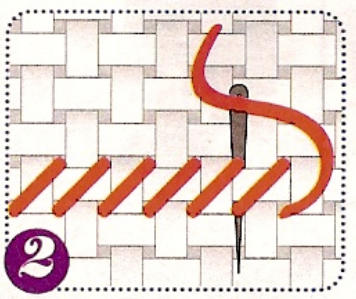
Para começar

Passe a agulha com a linha do avesso para o direito do tecido. Deixe uma ponta no avesso de 3cm. Segure-a com os dedos e faça os primeiros pontos, prendendo-a pelo avesso.

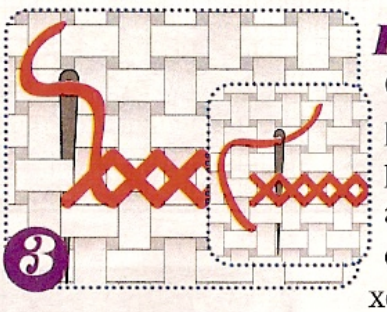
Passo a passo



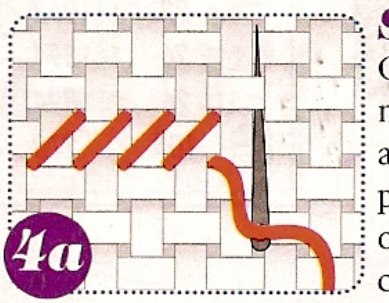
Ida: Entre 1 quadradinho acima e para o lado direito, saindo no quadradinho abaixo. Repita o procedimento para os demais pontos.



Volta: Faça o mesmo movimento no sentido contrário, da direita para a esquerda, completando o ponto.

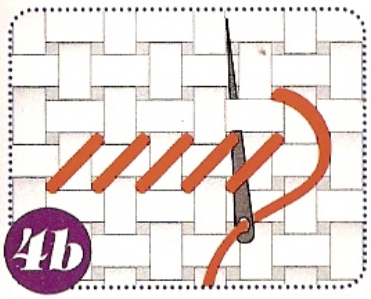


Descendo: Quando completar o último ponto, saia com a agulha 1 quadradinho abaixo da carreira que acabou de bordar, do avesso para o direito. Comece uma nova carreira.

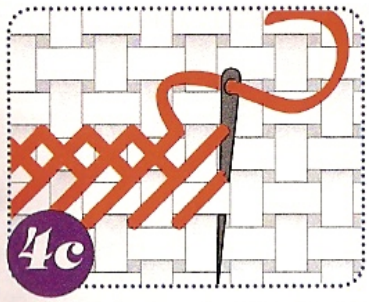


Subindo: Comece a primeira carreira e, antes de voltar para completar o ponto, saia com a agulha 1

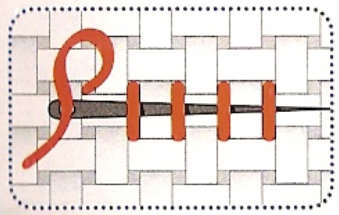
quadradinho acima de onde estava trabalhando.



Borde introduzindo a agulha de baixo para cima, saindo 1 quadrado acima da primeira carreira.

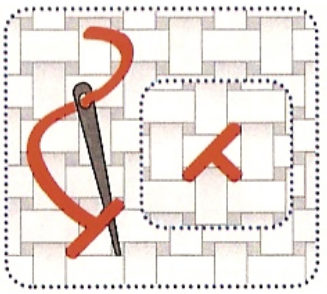


Volte completando a carreira de cima. Quando chegar no último, saia com a agulha 1 quadradinho abaixo, e complete os pontos da carreira inferior.



Arremate:

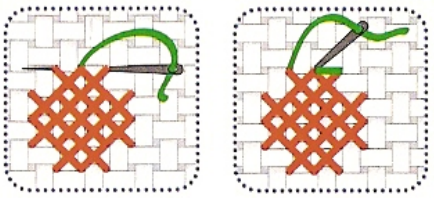
Saia com a agulha no avesso e passe por baixo de 4 pontos. Não dê nó.



Meio ponto:

Faça um ponto na diagonal. Volte com a agulha do avesso, saindo com ela exatamente no meio do ponto. Então, complete o meio ponto introduzindo a agulha no furo de um dos cantos. No gráfico, aparece como meio quadradinho (◪).

Contorno (ponto-atrás):



Saia com a agulha no lado direito, introduza 1 quadradinho atrás e saia novamente no direito 1 quadradinho à frente. Arremate prendendo a linha no próprio ponto, no lado do avesso.

Dica: O ponto-atrás é o que forma os detalhes importantes dos desenhos. Em alguns casos, não faz exatamente o contorno. Siga os gráficos.
